

FACE-TO-FACE
CORPORATE
PROFILE

FACE-TO-FACE
Oil Services

VISION/MISSION

VISION

To provide top of the range products and services using creative solutions driven by professionalism, integrity and tenacity with a keen focus on safety, quality, cost and operations optimization.

MISSION

To be a world class lubricants manufacturer and Engineering service company to our clients locally and globally.

CORE VALUES

In conducting our business, FACE-TO-FACE is inspired by and committed to upholding the principles of “RESPECT”, Reliability, Efficiency, Sincerity, Professionalism, Effectiveness, Competency and Transparency.

OUR TEAM

Prince Etim Akpaka - Chairman/CEO is a seasoned administrator, entrepreneur and a visionary leader with over 25 years experience in the following areas; security and safety maintenance, operations, pipelines engineering, procurement and construction, project management and drilling services.

Prince Akpaka is passionate about human capacity development in highly technology areas of oil and gas industry.

This is being achieved via various schemes that have been instituted through the companies he founded. Prince Akpaka is happily married with kid.

Prince Akpaka
(Chairman / CEO)

OUR TEAM

Candice Anderson Akpaka joins Face to Face Oil Services as its Human Resource manager. A Texas native, Candice received a Bachelors of Arts from Prairie View A&M University and is a former television news broadcaster.

Candice resides in the United States with her husband and daughter where she serves as the Business Development Officer for Marshal Security Office, a risk management security guard firm.

(Executive Director)

OUR TEAM

IFY OJUKWU (Secretary/Attorney)

Ifeoma Ojukwu is a graduate of law (LLB), she also hold a Master degree in law (LLM), Ify as she fondly called has over 15years outstanding experience in property. She also has strong and persuasive negotiations and interpersonal skills with ability to successfully analyze an organizations, critical support requirements and identify potential opportunities. While working as Customer Service Officer she gained excellent communication skills and telephone techniques. She also has marketing experience in a reputable oil and gas organization's and printing communications company.

As a company secretary where she work presently, she is responsible for efficient administration of the company particularly with statutory and regulatory requirement providing legal, financial and strategic advice during meetings. I am happily married with children.

KUN YONG (Technical Expert)

He joined 3M3S TECH PRIVATE LTD in 2016 with proven and vast track record in the field of invention and upgrading of Technology, Technical consultancy and Engineering services including Turn-key projects.

He has also been successfully involved in business activities of the company such as petroleum distillation and related activities, Waste/used lube oil refining, lube blending, crude Residue refining, Blowing / Oxidizing of Asphalt, white spirit and Manufacturing/Fabrication of complete Lube plant

He has cumulative experience of over 25years and he has travelled and worked across the globe, like Texas Futura LLC, Crookett, USA, RAF Technology Riyadh, Saudi Arabia, Oman Engine oil, Sohar, Oman, Al Ahsa Oil Factory, Al Ahsa , Gift Company for Refining and Marketing Lubrication Oils. Riyadh, Saudi Arabia, He also worked in UAE, Kuwait, Egypt, Nepal, Iraq and India to mention a few.

Over the years, He has been reliably and efficiently involve in post-sales services to the company's clients for smooth operations and business retention. He has also attended many conferences globally such as, NASCC Steel Conference and Exhibition as Exhibitor, and other various global Waste Lube oil Conferences.

FACE-TO-FACE Lube Production:

FACE-TO-FACE was registered as a limited liability company to carry on the business of ENGINEERING Services and general marketing and blending of lubricants and other petroleum and allied product.

FACE-TOFACE lube plant is one of the biggest and fastest growing Independent Lubricant blending Plant in Nigeria. Our ultramodern Lubricant Plant is located at Mowe, Ogun state for the blending of all brands of Lubricants.

The plants have an installed blending capacity of 50,000 MT/annum.

Having Raised the bar in the Technology

for the Production of Lubricants and to Maintain a High Standard in Quality and Uniqueness of our Products. We blend and manufacture the best lubricants for all types of engines, Our products are tested and trusted.

We are endowed with highly motivated and enthusiastic professionals driven by vision to excel in the production of quality products and services.

RECYCLED OIL AND PRODUCTS

We collect, process and recycle good-quality clear and black lubricants for reuse for a cleaner world. The cleansing and reuse of oil are among the best ways to utilize and transform industrial waste.

When oils are collected separately, energy is saved in the processing and the carbon footprint of the product is reduced. This makes it possible to save natural resources and achieve costs saving.

We drive the change towards a cleaner world with solutions that benefit the environment

When you order used oil from Face-To-Face you can be sure that the oil will be processed and recycled safely.

If your activities result in used oil that you would like to recycle in a cost-effective and environmentally friendly manner?

FACE-TO-FACE Engineering Solutions

FACE-TO-FACE is a project delivery company with vast experience in the oil and gas industry, infrastructure, FMCG and power sectors having operations in Liberia, Nigeria and the U.S.A

FACE-TO-FACE provides leading professional services in Instrumentation, Control & Electrical, Systems Integration and Automation, Metering & Measurement Solutions, Wellhead Solutions and Inspection Technologies.

Our goal is to deliver a timely, cost-effective, innovative and sustainable solutions to the satisfaction of our client. To achieve this, FACE-TO-FACE has partnered with best-in-class service delivery companies and OEMs which has positioned us as the company of choice to our clients.

We are committed to the Nigerian Local Content Act, and aim to develop and build Nigerian capacities and capabilities with a robust personnel training program.

FACE-TO-FACE Lube Production

FACE-TO-FACE offers quality inspection and testing services to support and optimize clients' operations.

We operate across the under-listed service areas:

Asset Integrity Audit

Assets Integrity Monitoring using Intrusive or Non-Intrusive Methods

Equipment Certification

Non-Destructive Testing in pipelines

Oil and Gas Radiographic Testing

Automated System

Safety & Security Services

Our Operation and Maintenance Division continues to grow our workforce of highly skilled and experienced personnel, having the capacity to undertake projects, providing operation expertise while displaying maintenance capability and skills. Our project experiences have helped us to gain valuable knowledge of systems, improving our learning curve, thereby reducing O&M risks & costs. With FACE-TO-FACE's diverse expertise of control systems and oil & gas application, we also help to reduce hassle of managing multiple vendors for any Operation and Maintenance.

Our services include:

- Asset Support.
- Production Support.
- Production Optimization.
- Operation and maintenance of LACT Unit.
- Operation and Maintenance of Autosamplers.
- Facility Survey and troubleshooting
- On site & Remote O & M Services.
- Operations & Maintenance Training Solution
- Resident and On-call O & M Services

Electrical & Instrument Engineering Services

FACE-TO-FACE specializes in process control optimization via Instrumentation, Control and Electrical services. This is achieved by offering end to end solutions to our clients.

We aim to leverage on years of systems integration expertise and experience as well as outstanding OEM relationships to offer turnkey solutions for any instrumentation, control & electrical needs of our clients.

FACE-TO-FACE provides a complete end-to-end solution for project and asset lifecycles and positions itself as a market leader in the Africa starting from engineering and design through to manufacturing & assembly including the construction and installation and commissioning & startup services.

- Packaged Control Rooms & E-buildings
- Electrical Switch Gear and MCC Package Supply
- Instrumentation Package Supply
- Instrumentation, Control & Electrical Construction Services
- Control system Engineering & Design Services
- Electrical System Engineering & Design Service
- Instrumentation Engineering & Design Services
- Electrical Startup & Commissioning Services
- Instrumentation Startup & Commissioning Service

Metering & Measurement Solutions

FACE-TO-FACE oil and gas services is a specialized engineering contractor for design, construction, pre-commissioning and commissioning of regulatory and field proven innovative solution for custody transfer flow measurement across Africa. While working within client's expectation, FACE-TO-FACE offers full metering solutions with full compliance to the government regulatory and statutory body requirements which meets the latest oil and gas industry standards.

We take up full responsibility of quality and flawless project delivery from the design stage through to the commissioning phase and then handover to client for all custody transfer/fiscal measurement unit.

Our full integrated metering solution gives our client peace of mind during their operations by ensuring maximum accuracy during flow measurement and allocation. (other parts related to the drawings on the profile can remain).

We also offer full metering solutions with full compliance to the government regulatory and statutory body requirement which meets the latest oil and gas industry standards.

These include:

- Flow Metering & Custody Transfer.
- Hydrocarbon Autosampling.
- Tank gauging & Oil Movement.
- Moisture & Gas Analyzing.
- Flare Metering.

Systems Integration & Automation

At FACE-TO -FACE , we have the required expertise to handle a wide array of control systems integration project ranging from basic process control system setup, Fire and Gas systems, SIS, safety surveillance system as well as full system integration for facility operation, monitoring and control purposes. Our setup and commissioning procedure ensure minimal downtime in your facilities as well as ensure that the plant efficiency and operational cost is maintained within desired threshold.

FACE-TO-FACE provides complete services, solutions and automation systems setup which includes:

- Process Control Systems
- Distributed Control Systems
- Safety Instrumented Systems
- Fire & Gas (F&G) Systems
- Field Instrument & sensors Simulation
- Plant Performance Solution.
- Condition Monitoring Systems (CMS)
- Power Management Systems
- Instrument Asset Management Systems (IAMS)
- Industrial Data Networks Communication Systems &
- PAGA Systems
- Security: CCTV, Anti-Intrusion Systems
- Plant Information Management (PIMS)
- MES & ERP Integration

Special Engineering Product Units

In delivering specialty engineered products as required by our clients, Face-To-Face has direct OEM relationships that cover the entire value chain of the oil and gas operations. We have relationships with the major equipment integrators., We offer a complete solution for all fiscal metering requirements in Oil & Gas Industry.

At Face-To-Face satisfying our customer is our major aim the reason why we provide full package metering solution to our customers. We design, construct, install, commission, operate and maintain the following:

- Crude Oil Custody Transfer Metering Unit.
- Gas Custody Transfer Metering skid.
- Produced Water Metering Skid.
- Pressure Reduction Metering Station.
- Fiscal Metering Skid.
- Fuel Gas Metering skid e.t.c.

We also offer a quick plug and play solution to ensure minimal disruption to the operations of our customers. Our expertise has clearly distinguished us in the Oil & Gas industry. We deliver complete project solution starting from procurement to construction to commissioning.
